

MCU-Miozinc (1) and MCU-Miomastic (2): The most universal products for Sea Stock

(1) Primer (2) Intermediate

Easy to use

- Single component
- One thinner
- No pot life restrictions
- No waste
- No recoat time
- Surface tolerant
- Tolerant to damp surfaces
- Resistant to moisture within 30min of application
- Compatible with almost any type of old paint
- 1 primer for the whole ship
- Fast cure
- Applicable at -12°C without losing performance
- No cracking up to 400µm DFT

Performance

- Outperforms epoxy mastics
- Barrier protection combined with cathodic protection
- Outstanding performance to minimal surface preparation
- Lasting flexibility

Costs

- Reduce waste costs dramatically
- No abuse
- Maximum quality assurance
- Reduce maintenance costs
